Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The information disclosure statements filed May 21, 2004 and December 9, 2004 are acknowledged. See enclosed IDS forms.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 is indefinite as it is unclear how a "seam" can have an opening. It appears that a tear seam can close an opening, but it is unclear how the seam can have an opening itself.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3616

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1, 2, 5, and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by DE 201 05 734 (cited in IDS).

DE 20105734 discloses a side gas bag having an exterior gas bag covering (12) in that there is provided an inflatable pouch (32) in an inflation region of the gas bag. As seen in Figure 1, the pouch (32) has an elongated, tubular shape with a first end (upper end at 18) as an inflation opening and a second end (side end) as an outflow opening. The pouch is directly connected with an inflation connection (18).

7. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Masuda et al. (6,199,898)

Masuda et al. disclose a side gas bag having an exterior gas bag covering (2, 3; see Figure 2j; see also Figure 1) in that there is provided an inflatable pouch (20; see column 3, lines 35-36- “band like sheet”) in an inflation region of the gas bag. As seen in Figure 1, the pouch (20) has an elongated, tubular shape with a first end (at 21) as an inflation opening and a second end (24) as an outflow opening. The pouch is provided with a tear seam (42; see Figure 8a) having at least one exhaust opening. The pouch is directly connected with an inflation connection (at 21).

8. Claims 1, 5, and 6 are rejected under 35 U.S.C. 102(e) as being anticipated by Keshavaraj (6,502,853).

Keshavaraj shows an side airbag (8) having an inflatable pouch (6) inside the airbag.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tanase ('878) shows a side airbag with an inner pouch. Hess et al. shows a side airbag with an inner pouch. Kalandek et al. shows a pouch of interest. Tanase et al. ('216) shows a side airbag of interest. Fischer is cited as an English equivalent of DE 20105734.
